

# Data Ops Solutions

Accelerate data release management  
with Salesforce DX Extensions

28 days to  
1 hour

Accelerate Full Sandbox  
Refresh

10X

More reliable

300X

Faster to Deploy Technical  
Data

Most complete Data Ops solution  
for Salesforce

## Smoke Testing

- | Increase quality all over your Salesforce environments
- | Detect Data and Metadata discrepancies between Salesforce environments and GIT/SVN automatically (every hour, every day, etc)

## Full Sandbox Data Alignment

- | Enhance training experience and make your tests more relevant
- | Replicate every Data change from Production to Full Sandbox (every hour, every day, etc)

## Sandbox Data Seeding

- | Accelerate developments with predefined data sets
- | Sample data from Production and seed Sandbox data in one click

## Technical Data Deployment (CPQ...)

- | Embed data into your CI/CD strategy
- | Automate deployment of technical data from Scratch Org to Sandbox to Production

Begin your Journey with Odaseva,  
the Data Governance Platform for  
Large Enterprises

Data Ops

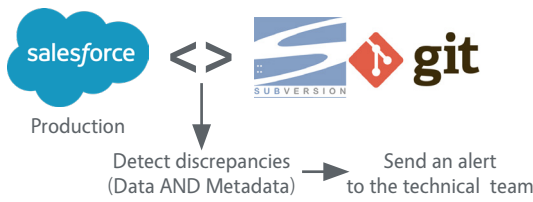

Data Privacy

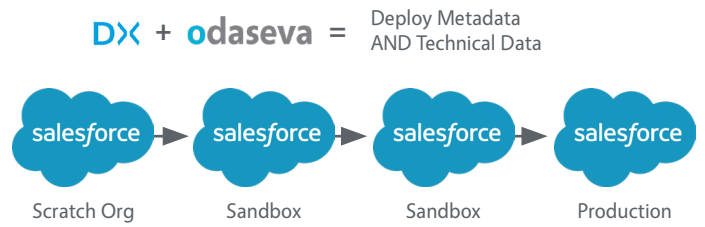

Data Protection

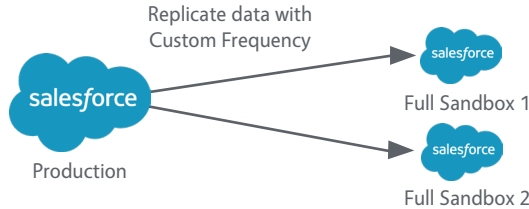

### Smoke Testing

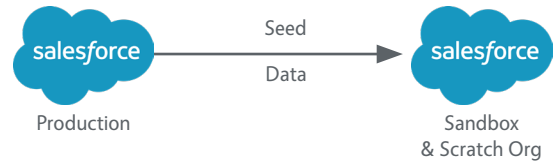

### Technical Data Deployment (CPQ...)

### Full Sandbox Data Alignment

### Sandbox Data Seeding
