

Data Protection

Protect Data Availability & Data Integrity

\$150

Average cost

per record lost

source: IBM cost of a data breach report 2019

\$300K

Average cost

of downtime per hour

source: Ponemon Institute and Emerson Network
Cost of downtime 2013

95%

Reduction

of data breach cost with automation

source: IBM cost of a data breach report 2019

Anticipate two types of disasters:
Data Loss (Integrity) and
Service Outage (Availability)

Data Availability Protection

Governor Limits AI

- | Monitor consumption (storage, API calls, etc) to prevent hitting a limit
- | Predict governor limits trends with AI technology

Archiving for Performance

- | Automate data archiving to maintain best performances of the system
- | Make archived data readable by end-users

Ultra High Availability

- | Continue doing business – even when Salesforce is temporarily unavailable
- | Failover system, read AND write

Data Integrity Protection

Backup and Restore

- | Backup at High-frequency and High Performances for Large Data Volumes
- | Recover from any data loss and maintain parent-child relationship up to 20 levels of depth

Begin your Journey with Odaseva,
the Data Governance Platform for
Large Enterprises

Data Protection

Data Privacy

Data Ops

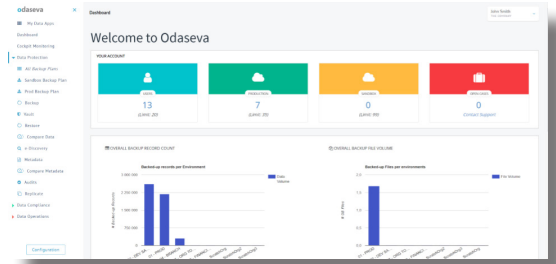

Complete Data Protection of your Salesforce environment

Granular AES 256-Encryption

Not only does Odaseva encrypt Disks with AES256, Odaseva also provides Granular AES256 Encryption with BYOK - the highest standard in Data Security.

Large Data Volume readiness

Fastest extraction speeds in the market (300 M records per hour and more). Control over Degree of Parallelism, API Load-Balancing, Horizontal and Vertical API optimizations.

Managed Protection Services (MPS)

Extend your team with world-class protection specialists. Proactive incident monitoring and performance maintenance.

CTA Expert Services

Implement Odaseva BCP methodology with world-class Salesforce Certified Technical Architects.

Industry Leaders trust Odaseva

« At Schneider Electric, we leverage Odaseva for a more flexible and agile data privacy automation, data protection and data ops»
